Operations Management Interface for System Platform Training Syllabus

COURSE INFORMATION
LENGTH: 4-DAYS

The Operations Management Interface for System Platform 2017 Update 2 course is a 4-day, instructor-led class designed to provide an overview of the features and functionalities released with Operations Management Interface for System Platform. It covers the components and capabilities of the software, as well as topics to help you build and deploy an Operations Management Interface for System Platform visualization application. It also introduces tools for creating graphics, visualizing alarms and events, visualizing trends and history, and implementing security in an Operations Management Interface for System Platform application. Hands-on labs are provided to reinforce the knowledge necessary to use the Operations Management Interface for System Platform software.

Who should attend?

Individuals who need to configure or modify Operations Management Interface for System Platform applications

Objectives

- Describe Operations Management Interface for System Platform visualization components
- Create display layouts for visualization applications
- Create and run visualization applications
